TALLGRASS ROBOTICS

Autonomous weeding for organic vegetable farms

Series A pitch. Sample deck: the company and its figures are fictional.

November 12

Weeding without herbicide or a tractor

PROBLEM

Existing systems cost $250K and up

Today's weeding systems are big and tractor-mounted.

OUR ROBOT

A small robot that weeds on its own

Herbicide-free weeding for organic vegetable farms, sold or leased.

Already working on farms
